RoHS Notice

January 3, 2013

The **Restriction of Hazardous Substances (RoHS) Directive, 2011/65 EC**, is a EU directive that restricts the levels of certain substances in electronic and electrical parts and equipment, medical and in-vitro diagnostic devices.

ALM Corporation does not manufacture its products with, or add any of the RoHS listed substances to its products.

To the best of our knowledge, our raw materials do not contain the RoHS restricted substances and they are not expected to be found in Nylene polymer resins.

ALM Corporation is a manufacturer of polymer resins and does not manufacture electrical, electronic, medical or diagnostic parts or equipment. We do not analyze our raw or final products for the presence of the restricted substances or require our raw material suppliers to do so. It is the responsibility of the manufacturer of the products covered by the RoHS Directive to determine compliance of their products with this directive.

For further information, please contact our Customer Service Department at 973-694-4141.
